PROJECTS

RecruitAI – AI Resume Screening System

Live Demo: resume-matcher-frontend-eight.vercel.app

- Developed an AI-powered resume screening platform that analyzes resumes and assists recruiters in evaluating candidates efficiently.
- Built a responsive dashboard using **React, Vite, and Framer Motion** for smooth UI interactions and modern design.
- Implemented backend services using **Node.js** and **Express.js** to process uploaded resumes and manage candidate data.
- Integrated **OpenRouter API** for AI-based resume analysis including skill extraction and hiring insights.
- Designed candidate-job matching logic to calculate match scores and rank candidates based on job requirements.
- Used **MongoDB** to store candidate profiles, parsed resume data, and analysis results.
- Deployed the frontend on **Vercel** and backend on **Render** for scalable cloud hosting.

Manaavta Hitaay NGO Website (Ongoing)

Live Project: <https://maanavtahitaay.org/>

- Designed and developed the frontend of an NGO website using **React.js** and **Tailwind CSS**.
- Built a fully responsive and user-friendly interface to showcase NGO initiatives, events, and impact.
- Engineered and deployed reusable UI components, standardizing 15+ key design elements and improving frontend development speed by 30
- Integrated Razorpay payment gateway to enable secure online donation functionality.
- Hosted the website using .org domain for fast and reliable hosting.
